Notes & Methodology

- Date Tested: 05/05/2026. Methods: Full QC Panel.
- The sample was confirmed to be CJC/Ipamorelin by HPLC. Identification by chromatographic retention time comparison with a reference standard.
- Elemental impurities analyzed by ICP-MS per USP <233> methodology. Acceptance criteria are internal laboratory quality screening limits for research-use materials and do not represent evaluation against any specific pharmacopeial monograph or route-of-administration standard.
- Per-component content calculated from total net peptide content using the manufacturer's stated formulation ratio (CJC-1295 50%, Ipamorelin 50%). All components confirmed present by HPLC identity testing.
